STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage and disposal

Pesticide Storage

Keep out of reach of children and animals. Store in original containers only. Store in a cool dry place and avoid excess heat.

In case of spill, avoid contact, isolate area and keep out animals and unprotected persons. Confine spills. Call FMC: (800) 331-3148.

To confine spill: Cover to prevent dispersal. Place damaged package in a holding container. Identify contents.

Pesticide Disposal

Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

Container Disposal

Wrap FirstLine™ GT Termite Bait Station and put in trash. Plastic bags: Completely empty bag. Then dispose of empty bag in a sanitary landfill or by incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

Food Handling Establishments: Places other than private residences in which food is held, processed, prepared or served.

Non-Food/Feed Areas: Includes garbage rooms, lavatories, floor drains (to sewers), entries and vestibules, offices, locker rooms, machine rooms, garages, mop closets, and storage (after canning or bottling). Areas conducive to termite attack or through which termites may enter should be treated.

Food/Feed Areas: The FirstLine GT Termite Bait Station is not labeled for use in commercial food/feed areas. Do not use in food/feed areas of food/feed handling establishments, restaurants or other areas where food/feed is commercially prepared or processed. For indoor application in the home or similar areas, do not place FirstLine GT Termite Bait Stations in an area where there is the possibility of contaminating food or surfaces that come in contact with food. Not for use in USDA Meat and Poultry Plants.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

FirstLine GT Termite Bait Stations are ready to use and filled with a treated cellulosic matrix containing 100 ppm sulfiramid, a slow acting insecticide. The use of this bait suppresses or controls termite infestations. The termite activity depends on the species involved, weather, moisture, and the time of year. Termites may require 1 to 4 months or more for control in and on commercial, industrial, institutional and residential buildings and structures, and their immediate surroundings. Permitted areas of use include but are not limited to industrial buildings, houses, apartment buildings, laboratories, and the non-food/feed areas of stores, warehouses, schools, nursing homes, hospitals, restaurants, hotels, churches, food manufacturing, processing and service establishments. The bait is effective against: Coptotermes, Heterotermes, and Reticulitermes termites.

For Structures With an Active Infestation

For use in and around residential, daycare and pre-school structures, apply up to 60 FirstLine™ GT Termite Bait Stations per unit.

A unit is a single family dwelling (Single home or Townhouse). A garage, whether attached or detached is considered part of a primary residence.

For use in and around commercial, industrial and institutional structures (except daycare or pre-school structures) use as many FirstLine GT Termite Bait Stations as needed.

Use FirstLine GT Termite Bait Stations for detecting and/or controlling termites. The FirstLine GT Termite Bait Stations may be inserted into soil, mulch, stumps, wood members, slabs, infested trees, or wherever practical. For best results, install FirstLine™ GT Termite Bait Stations (2 or more) in each critical area suspected to contain termites. Drilling may be required to install the FirstLine GT Termite Bait Stations into infested wood and trees. The FirstLine GT Termite Bait Stations should be distributed in infested areas of the tree and in the soil near the tree. Focus on areas of termite tubing.

FirstLine GT Termite Bait Stations must be placed in close proximity to actively foraging termites so that the bait may be located by the termites and ingested. Time required for control varies depending upon how quickly the termites tube into or enter the station and feed upon the bait.

Minimize disturbance of termites during all phases of the FirstLine GT Termite Bait Stations installation and inspection. Replace the FirstLine GT Termite Bait Stations before termites consume all of the bait within a tube station.

The PCO must inspect the FirstLine GT Termite Bait Stations every 2 to 4 weeks until the bait is consumed and/or termite activity ceases, replacing any stations with significant feeding (at least 50% of bait consumed) or in use for 12 months in and around residential, daycare and pre-school structures. The frequency of inspection should be adjusted according to termite species, foraging pressure and climatic conditions. After feeding has stopped, continue to monitor the stations every two to four months for the next twelve months and then annually, replacing or disposing of any station in use for 12 months in and around residential, daycare and pre-school structures.

Attention

Do not apply more than 60 FirstLine GT Termite Bait Stations per unit in and around residential, daycare and pre-school structures.

Do not install FirstLine GT Termite Bait Stations within wells.

Do not install FirstLine GT Termite Bait Stations into termiticide treated soil.

Do not spray FirstLine GT Termite Bait Stations during routine pesticide applications.

Do not reuse FirstLine GT Termite Bait Stations at other properties.

Do not place bait in an area where there is the possibility of contaminating food or surfaces that come in contact with food.

Do not use on any tree used in food/feed production.

Do not install FirstLine GT Termite Bait Stations in contact with water.

Contact APG Specialty Products at: (800) 321-1362 for assistance in using FirstLine GT Termite Bait Stations or other components of the Termite Management System.

Distributors Should Sell in Original Packages Only.

Terms or Sale or Use: On the purchase of this product buyer and the user agrees to the following conditions:

Warranty: FMC makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Except as so warranted, the product is sold as is. Buyer and user assume all risk of use and/or handling and/or storage of this material when such use and/or handling and/or storage is contrary to label instructions.

Directions and Recommendations: Follow directions carefully. Timing, method of application, weather conditions, mixture with other chemicals not specifically recommended and other influencing factors in the use of this product are beyond the control of the seller and are assumed by the buyer at his own risk.

Use of Product: FMC's recommendations for the use of this product are based upon tests believed to be reliable. The use of this product being beyond the control of the manufacturer, no guarantee, expressed or implied, is made as to the effects of such or the results to be obtained if not used in accordance with directions or established safe practice.

Damages: Buyer's or user's exclusive remedy for damages for breach of warranty or negligence shall be limited to direct damages not exceeding the purchase price paid and shall not include incidental or consequential damages.
