For Control of Bedbugs and Bedbug Eggs

NUVAN PROSTRIPS+ may be used to control crawling bedbug nymphs and adults exposed to product vapors for 48 hours. In difficult to treat areas, a minimum treatment time of 72 hours will provide better results. The strip may be used to control bedbugs that have entered various items in an infested structure including, but not limited to: electronics, appliances, footwear, art work, collectibles, plush toys, clocks, radios, wall hangings, telephones, computers, printers, mattresses, box springs, books, lamps, furniture and other such items. Place infested items in a container or room that is closed in a manner to contain the strip vapors during treatment. The sealed volume for treatment should not exceed the volume to be treated for the size of the strip used. Multiple strips can be used in a large space and should be distributed uniformly over the space being treated. Take care to avoid direct contact of the strip with the surface of items being treated. Seal items in the treatment for a minimum of 48 hours to kill bedbug nymphs and adults. To kill any bedbug eggs, seal items in the treatment space for seven days if bedbug eggs are suspected to be present. The presence of air space or volume within the sealed treatment space is desirable to enhance the exposure to the product vapors. Identify sealed treatment areas by label indicating a pesticide treatment is in process that should not be disturbed by unauthorized persons and the label should include the date, pest professional person or company responsible and contact telephone number. When treatment is completed, remove treated items from the treatment in a well ventilated area and air out for a period of not less than two hours.

How much space will one strip treat?

Strip Size	Treats	Approx. Equivalent to Area Measuring
65 grams	900 to 1,200 cu. ft.	8' x 10' x 11' = 880 cu. ft.

Always use the appropriate size and number of strips for the space being treated. If more than one is required, distribute them over the space equally.
